Reliability

Strict service level agreements and 24x7x365 monitoring provides customers with maximum network availability.

Flexibility

Our scalable networks provide dedicated bandwidth and multiple delivery options to meet the unique needs of each customer. Affiniti deploys fiber, wireless and hybrid networks and a host of advanced network services.

Experience

A newly-formed company with decades of experience, Affiniti places high priority in building customer relationships, and focuses on developing long-term partnerships with customers. Affiniti delivers services to nearly one million students, over 45 hospitals and over 1,000 customer sites across the United States.
